

# DISINFECTION SERVICES

## SERVICES TO DISINFECT COVID-19 AND OTHER PATHOGENS

CimeX Control is now available for cleaning and disinfection services in the Phoenix area.

### The Process:

- ✓ The Disinfection Application Process includes use of an electrostatic pump, battery or manual sprayer
- ✓ CimeX Control uses hospital grade, EPA approved disinfectants
- ✓ We follow CDC guidelines including the use of Personal Protective Equipment (PPE)

### High-Touch Areas:

- ✓ Light Switches
- ✓ Handrails
- ✓ Elevator Buttons
- ✓ Door Handles
- ✓ Restrooms (faucets and dispensers)
- ✓ Phones, Keyboards and Mouse Devices

Buildings**

**Playgrounds**

**Restaurants**

## **THE CIMEX CONTROL DIFFERENCE:**

Our technicians use filtered water for spray disinfection services to combat water spots. Arizona is known to have a hard water problem, and using this water leaves unsightly water spots behind after the disinfection application process. The use of filtered water makes a huge difference for clean and clear results.
